CADILLAC MINES CORPORATION

To the attention of the community members of the McGarry Township,

Following comments made during a presentation by our CEO and Director, Rick Howes, during an investor conference on September 29th, 2026, there have been several subsequent related social media posts in the community. The team at Cadillac Mines would like to clarify some of the information being shared online and answer the concerns that are being raised by the community.

Foremost, our team would like to apologize to the residents of the McGarry Township for the comments that were shared by Mr. Howes in a public setting prior to our scheduled open discussions with community members, and the concerns that they have raised. Our team remains fully committed to working with the community and regional rightsholders and stakeholders to find an acceptable pathway to develop a project that is positively integrated into the local area.

As indicated at the September 19th Community BBQ event, Cadillac Mines will be holding a community-wide public meeting in October. We can confirm this meeting will be on Wednesday October 28th, 2026, at the McGarry Township Community Centre to ensure that all interested community members have access to the latest information regarding the Kerr-Addison Project. This meeting will aim to share available information regarding the potential scope and scale of the project, provide clarity about upcoming next steps until the end of the year and into 2027, and most importantly, listen to the community's concerns and questions. Communications will be issued in the coming days to invite community members to participate in the October 28 meeting and provide details regarding the meeting time.

In the meantime, the team at Cadillac Mines would like to provide some clarifications regarding information that has been circulating on social media. Currently, the company is still assessing various development scenarios to define the full potential of the Kerr-Addison Project. Cadillac Mines has publicly committed to hold open and transparent consultations with the community to better understand local interests and expectations, and to ensure that the project brings maximum positive benefits to the region. The company remains firm in this commitment.

Should there be questions or concerns regarding the Kerr-Addison Project going forward, Cadillac Mines invites the community to reach out directly to our Community Relations team at the following email address and phone number: contact@cadillacmines.com | 705-998-4392. This will ensure that members are able to directly communicate their feedback to our team and that they are provided clear answers.

Sincerely,

Leon LeBlanc
